Elastomeric Gap Filler

Saint-Gobain® ThermaCool TC3006S is an extremely soft ceramic-filled silicone elastomer typically supplied with a PET release liner on both sides. The product is intrinsically tacky and can be compressed over a wide range of stack up tolerances with minimal force applied to component parts. TC3006S can be supplied with a fabric or film on one side for additional support during handling and assembly.

Features & Benefits

- Extremely soft and compliant gap filler
- Integral support using fabric or PET film
- Fabric support provides good cut resistance for high abuse applications
- Very low pressure applied to assembled components
- Useful for spanning multiple components with different height to minimize force on joints

APPLICATIONS

- Telecommunications
- Notebook computers
- Consumer electronics
- EV battery
